Moqaddas Zubia

BUSINESS OPERATIONS | AI & PROCESS OPTIMIZATION

Ahmedabad, India · moqaddaszubia28@gmail.com · linkedin.com/in/moqaddas-zubia

PROFESSIONAL SUMMARY

Business Operations and Process Optimization professional with 2+ years of experience across quality analytics, fraud prevention and AI-assisted workflow improvement. Skilled in analysing business processes, identifying operational gaps and bottlenecks, conducting root-cause analysis and translating findings into practical recommendations. Hands-on experience with LLM models and prompt engineering for transcript analysis, structured research, documentation and repetitive-task support. Proficient in Advanced Excel and Google Sheets.

CORE SKILLS

Business process optimization: workflow analysis, process gap identification, bottleneck analysis, root-cause analysis, process standardisation, SOP documentation, continuous improvement

LLMs & prompt engineering: prompt design, prompt testing, AI-assisted analysis, workflow automation, output validation

Cross-channel strategy: speech analytics, text analytics, AI voice agents, conversation intelligence, call transcript analysis

Data & performance metrics: Advanced Excel, Google Sheets, KPI reporting, QA scorecards, trend analysis, data validation

Business operations: process mapping, operational efficiency, stakeholder coordination, workflow documentation, cross-functional collaboration

Quality, risk & compliance: quality assurance, fraud prevention, transaction monitoring, compliance reviews, exception handling

PROFESSIONAL EXPERIENCE

Associate, AI & Business Operations · CallHippo

Sep 2026 – Present

- Analyse AI-led and human-led demo-booking conversations to identify differences in customer engagement, booking confirmation and demo attendance.
- Run root-cause analysis of demo no-shows by reviewing call transcripts, agent communication patterns, confirmation practices and customer intent.
- Use LLM tools to analyse call transcripts, identify recurring patterns and turn findings into structured business insights.
- Compare AI-agent scripts with effective human-agent conversations to find gaps in engagement, objection handling, confirmation and customer commitment.
- Develop recommendations for AI-agent script refinements to improve conversation quality, booking effectiveness and demo attendance.
- Identify gaps in calling workflows and explore ways to improve agent productivity through conversation intelligence, process changes and automation.

Quality Analyst II, Speech & Text Analytics · ETS Labs

Jun 2025 – Aug 2026

- Analysed customer service, technical support and sales interactions to identify quality gaps, process deviations and performance trends.
- Ran root-cause analysis on recurring errors and performance gaps, translating findings into structured feedback and actionable recommendations.
- Built Speech Analytics searches and automated reports to surface customer trends, interaction patterns and compliance risks.
- Tracked performance through QA reports, scorecards and reporting in Advanced Excel and Google Sheets.
- Maintained SOPs and process documentation, and took part in internal and client calibration sessions to align quality scoring.

Fraud Prevention Representative & Subject Matter Expert · TTEC

Apr 2022 – Jan 2023

- Monitored customer transactions and account activity to identify suspicious patterns, potential fraud and financial risk.

- Investigated fraud alerts, documented findings and followed established procedures.
- Acted as Subject Matter Expert on fraud workflows, giving process guidance and real-time support on complex and escalated cases.
- Reinforced process updates and SOP requirements through peer coaching, knowledge sharing and feedback.

EDUCATION

- Bachelor of Business Administration (Finance), Jain University, 2025 · 86%
- Class XII, JUSCO School, Kadma · 95%
- Class X, JUSCO School, Kadma · 86%
